

INITIATIVE TO EMPOWER CASAMANCE YOUTH THROUGH LEADERSHIP TOWARDS RECONCILIATION

Testimonial

We believe that leadership training in our school will help facility in the development of our students. Students will be able to take charge of and manage their schools. The behaviour that this program will teach them will be benefit to the smooth running of the college.

We are used to involving students in activities and leadership will help develop these at school: making breaks, repairing the fence, weeding, sports and cultural activities, etc. When the students become more responsible for initiating and perpetuating this kind of action, it would be ideal. We hope that this program of leadership training can serve as a trigger for this process.

The training program in leadership may be perceived to us from college Sindian as an extension of the Education for Peace, which will enter its third year in our school.

Remember, the majority of our students come from the border with Gambia, an area very unstable because of the Casamance conflict. Our students will receive leadership training and this will, undoubtedly, positively influence the ongoing peace process.

Moulaye Sonko
Teacher, C.E.M. of Sindian
The Casamance Region, Senegal
